

CUAHSI Cyberseminars

Spring 2010 Series

“Spotlight on Instrumentation”

February 26 - Jared Abraham, USGS (Denver) & James Cannia, USGS (Lincoln)

- Using airborne geophysical surveys to improve groundwater resource management models

March 12 - Manish Gupta, Oregon State University

- High-frequency field-deployable isotope analyzer for hydrological applications

March 19 - Brian Waldron & Beatrice Magnani, University of Memphis

- Applications of geophysical prospecting in hydrology

April 2 - Jeanne VanBriesen, Carnegie Mellon University

- Sensing at Engineered and Natural Water System Interfaces

April 16 - Bridget Scanlon, Laurent Longuevergne & Clark Wilson, University of Texas at Austin

- Advances in Ground-based Gravity for Hydrologic Studies

April 30 - Jim Heffernan, Florida International University & Matt Cohen, University of Florida

- Inferring biogeochemical processes from high-frequency nitrate measurements in flowing waters

Seminars are on Fridays @ 3:00pm ET

Seminars are free and open to the public. All seminars are recorded and can be viewed at the CUAHSI website approximately one week after the live presentation.

Consortium of Universities for the Advancement of Hydrologic Science, Inc.
