Planning Your Fall AGU Schedule

Items of interest at the Fall AGU Meeting

- **CUAHSI Reception at Fall AGU:** Tuesday, December 14th at the Grand Hyatt— meeting begins at 6:30pm; reception following until 9:00pm. Hors d'oeuvres & libations will be served. This year, there will be tables in the reception area displaying information about some of the projects in which CUAHSI is involved. For example,
 - Hydrosynthesis/Multiversity activities
 - "Let's Talk About Water"
 - HydroGeoPhysics Facility
 - CTEMPS
 - Distributed Temperature Sensing
 - Informatics
 - "Meet the Directors"
 - and others

There will be "live" people staffing the tables to answer your questions or to generally discuss that particular project. We anticipate additional topic areas being present at the reception, so please come by and partake of the culinary and scientific offerings.

Finding Water Data with CUAHSI-HIS

See a video where HydroDesktop is used to describe the hydrology of Jacob's Well Spring, Texas. Tim Whiteaker, Research Associate at The University of Texas at Austin, narrates a 16 minute video that describes CUAHSI-HIS. Tim demonstrates the use of HydroDesktop to access, download, and analyze discharge and temperature time series data for the Jacob's Well Spring area. The video is available for viewing at <http://data.cwrw.utexas.edu/JacobsWellSpring/>

CUAHSI Fall 2010 Cyberseminars Wrap-up

The Fall cyberseminar was a great success. Attendance at all the webinars was impressive and the presentations were well received and thought-provoking--judging by the oft-times extended Q&A sessions following the slide shows. We are already gearing up for the Spring 2011 semester of seminars. Further information will be forthcoming in future newsletters.

Fall semester cyberseminars you might want to view again or, if you missed them, for the first time:

- **John Pomeroy (University of Saskatchewan)** on September 17th entitled *Advancing hydrological processes to better predict hydrology in cold regions* is available at <http://cuahsi.acrobat.com/p94957652/>.
- **Mark Green (Plymouth State University)** on October 1st entitled *Extracting characteristic hydrologic patterns from many catchments: the case of stream water total nitrogen to total phosphorus ratios* is available at <http://cuahsi.acrobat.com/p87488634/>.

June 5-8, 2011

- [International Ground-Water Modeling Center \(IGWMC\) — MODFLOW and More 2011](#) - Colorado School of Mines, Golden, CO

July 9-15, 2011

- Gordon Research Conferences [2011 Catchment Sciences — Sentinels of Global Change](#) - Bates College, Lewiston, ME
