

## **Become an Instructor for the CUAHSI Virtual University!**

CUAHSI Virtual University is composed of inter-university online courses aimed to enhance the depth and breadth of graduate course offerings at universities across the nation, increase the rate of uptake of new research and facilitate networking among our hydrologic community.

The format of the course is designed to give students flexibility to select the three topics most relevant to them from a list of Specialized Online Hydrology Course modules. Modules are offered by leading faculty in these specialized research niches from across the country. Each module, which is equivalent to one-third of a semester course, is designed to facilitate interaction among the instructor and students and contain some evaluation elements (problem sets, projects, presentations, exams etc.). The instructor at each student's home university will assign a grade based on the student scores and class distribution provided by the module instructor.

The course will run from September through November with each module being conducted for 4 weeks.

### **Benefits**

#### **To Students**

- Access to national experts in extremely specialized hydrologic subdisciplines
- Wider selection of course offerings than typically available
- Networking and collaboration with students and faculty nationwide
- Ability to develop research skills not available at home institution

#### **To Faculty**

- Opportunity to teach within research niche in an extremely specialized manner to a motivated and diverse cohort
- Leveraging of teaching effort (3:1)
- Diversified educational opportunities for students at home university to expand their research skill set
- Improved national visibility

#### **To Institutions**

- Greater depth and breadth of course offerings
- Improved national recognition of program strengths
- Enhanced teaching efficiency

#### **To the Discipline**

- Faster spread and acceptance of research innovations
- Greater collaboration and community awareness of research activities

### **NEXT STEPS**
